<b>Economic Impact of the Health Care Sector**</b>	\$266,066,834

\*Refers to tax revenue generated to federal, state and local governments paid by the county's health care sector, their suppliers and employees.

\*\*The health care sector includes hospitals; offices of physicians, dentists and other health care providers; nursing and residential care facilities; other ambulatory health care services; and home health services. Direct economic impact for the health care sector is the total value of production of goods and services. This direct economic impact total is not simply the sum of the numbers that appear here as "totals."
